

# PTOLEMY

Telecon to be held on 23 of March 2018 at 16:00 Rome Time Zone

Agenda:

- 1) What next after LoI sent to LNGS SC?
- 2) WPs should provide asap a list of items for students in a defined time frame where possible.
- 3) Conference participation

A.O.B

Minutes:

A general satisfaction was expressed by everybody about the new document that was submitted to the LNGS SC on 19 of March.

A feedback is expected during talk at the closed session of the LNGS SC.

The document will evolve and a new deadline for other contribution is 5 of April to prepare a new document for the Italian "Commissione II".

The contribution from Physics WP will come by next Monday.

Marcello pointed out, in agreement with Alfredo and Chris, that a list of items for master thesis or even longer time-range project should be provided. All the WP coordinators will provide inputs and all proposals collected in a file and made available for consultation on the wiki.

Gianluca asked if there is any Summer student program at LNGS. Marcello will check with the head of research division of LNGS if there is any.

The PTOLEMY project starts to be well-known and receives request of a talk from many conferences and workshop. In view of having one day a speaker board we should start to collect Systematically possible conferences. A new link named Conferences is started on the wiki. We should collect there the list of talks we are asked to give and also of conferences where we like to be present. Everybody that has a talk request can tell Alfredo/Chris/Marcello that will input the information on the wiki.

It was pointed out that a cost estimate should be organized in a systematic and uniform way to present to the founding agency coherent information. So far, the cost estimate are scattered all over the place.

Today the attendance was very little. Alfredo will circulate a new doodle trying to pick another day which hopefully will maximize the attendance. The time is always after 15:00 till 18:00 LNGS time/zone.
